

Request for Expression of Interest for a Database and IT Specialist

World Agroforestry (ICRAF) is a Centre of scientific and development excellence that harnesses the benefits of trees for people and the environment. Leveraging the world's largest repository of agroforestry science and information, we develop knowledge practices, from farmers' fields to the global sphere, to ensure food security and environmental sustainability.

ICRAF is the only institution conducting globally significant agroforestry research in and for all the developing tropics. Knowledge produced by ICRAF allows governments, development agencies, and farmers to use the power of trees to make farming livelihoods more environmentally, socially and economically sustainable at scales

We are headquartered in Nairobi, Kenya, and operate six regional programmes in Sub-Saharan Africa, Asia and Latin America.

To learn more about our organization, please visit our website: <http://worldagroforestry.org/>.

About the role

We are seeking the services of a consultant with sound experience to work with the Government of Sri Lanka - GoSL (MEWR), the Climate Change Secretariat at MEWR and ICRAF to contribute to the implementation of a Green Climate Fund (GCF) funded Project titled: Support to NDA and Country Programming in Sri Lanka: Readiness in the Vulnerable Upper Watersheds.

Requests for Expression of Interest

ICRAF invites eligible and qualified Consultants to indicate their interest in providing these services. The Consultant must provide information indicating that they are qualified to perform these services together with a detailed CV/Profile with specific description of previous similar assignments undertaken.

Qualifications of Consultants

- 10+ years' experience in Data Management Integration, Database Design and Development.
- Web, software, and IT development expertise.
- Experience in data management practices and possess excellent data integration skills
- Experience using statistical computer languages (R, Python, SLQ, etc.) to manipulate data and organize large data sets.
- Experience with the following:
 - Data & systems integration middleware
 - Data quality, and data enrichment services
- Sound knowledge of the research community in Sri Lanka
- Excellent communication skills with a good command of written and verbal communication in Sinhala and English, proficiency in Tamil is desirable.
- Strong team player, good interpersonal skills and should be energized by performing in a diverse team.

How to apply

Interested applicants that meet the requirements are invited to submit the following to HumanResources@cgiar.org

- A CV highlighting relevant experience of conducting similar tasks,
- 3 samples of infographics/illustrations relevant for the scope of this assignment,
- A financial quote for the work.

Please note that only short-listed applicants meeting the above requirements will be contacted. Terms of reference will be provided to the successful candidate.
